Weekly revenue, expenses and a phased plan to balance the budget

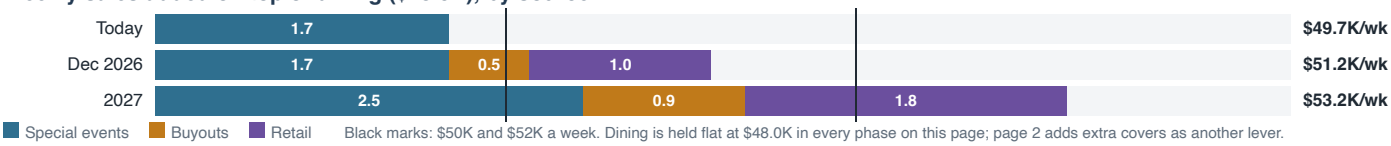

Urban Hearth | prepared Oct 22, 2026 | cash-basis P&L, Jan 1 - Oct 20, 2026 (events through Oct 21) | October pace | core = dining on regular nights + on-site special events; catering is separate (page 3) | $K = thousands; month = weekly x 4.33

$48.0K/wk	+$1.7K/wk	$49.7K/wk	-$7.4K/mo
core dining sales (about $208K a month)	special events, averaged ($87.5K a year on-site)	total core revenue (about $215K a month)	operating result today (-$1.7K a week)

A typical week	week $K	month $K	year $K
Core dining sales (regular nights, net of comps)	**48.0**	**208.0**	**2,496**
Special events, on-site (2026 average)	**1.7**	**7.3**	**88**
Total core revenue	**49.7**	**215.3**	**2,584**
Cost of goods, dining (28.6%)	13.7	59.5	714
Card & processing fees, dining (4.2%)	2.0	8.7	105
Event costs: food, drink, extra staff (40% of events)	0.7	2.9	35
Payroll: kitchen hourly (incl. overtime)	11.6	50.3	603
Payroll: management salaries	6.8	29.5	354
Payroll: front-of-house hourly	3.5	15.2	182
Payroll: taxes & benefits	3.5	15.0	180
Payroll: bonuses & other pay	0.3	1.3	16
Rent, utilities, insurance, supplies, other	7.5	32.5	390
Loan interest	1.8	7.8	94
Total expenses	**51.4**	**222.7**	**2,672**
Operating result	**-1.7**	**-7.4**	**-89**

Step	Measured as	Sales / wk	Result / month	Result / year
Operating result today (dining + events)		**$49.7K**	**-$7.4K**	**-$89K**
Phase 1: now through December 2026				
More buyouts	about 6 a year at ~$4K net added ($2.0K a month)	+$0.5K	+$1.2K	+$14K
Retail at holiday pace	$4.5K a month (Nov-Dec 2025 pace)	+$1.0K	+$2.5K	+$30K
Back-of-house overtime to Sept level	$3.6K a month		+$3.6K	+$43K
Software, storage, decor (cautious)	$0.5K a month		+$0.5K	+$6K
Result, December 2026		**$51.2K**	**+$0.4K**	**+$4K**
Phase 2: 2027				
Retail grows to $8K a month	$3.5K a month more	+$0.8K	+$1.9K	+$23K
More special events	4 more a year at $10K each ($40K)	+$0.8K	+$2.0K	+$24K
More buyouts	6 more a year at ~$4K net ($24K)	+$0.5K	+$1.2K	+$14K
Healthcare re-evaluated	half to all of the $2.7K a month		+$1.4K to +$2.7K	+$16K to +$32K
Result, 2027		**$53.2K**	**+$6.8K to +$8.2K**	**+$82K to +$98K**
Phase 3: late 2027				
OpenTable marketing credit ends	about $5K a month		-$5.0K	-$60K
Result, late 2027		**$53.2K**	**+$1.8K to +$3.2K**	**+$22K to +$38K**

Weekly sales added on top of dining ($48.0K), by source

Black marks: $50K and $52K a week. Dining is held flat at $48.0K in every phase on this page; page 2 adds extra covers as another lever.

The assumptions. Special events and buyouts keep 60% of added sales after food, drink and extra staff; retail keeps 55%. An extra buyout adds about $4K net (about $2-3K on a normal night, more on a normally closed Monday). A special event is about $10K.

The baseline is October's pace. Regular nights are running about $8.0K net of comps ($48.0K a week). September ran lower, at about $7.2K a night ($43K a week), mostly because the patio closed, so each $1K a night is worth about $6K a week. Buyout nights (about one a month so far) and event nights aren't in the dining figure.

Cash relief is separate. Mass Ave rent ($2.95K a month) and the $2K a month security deposit stop after the old location sells and November. Together about $4.95K a month of cash, not in the operating result above.

Notes. "After loan principal" figures on page 2 subtract about $15.2K a month of principal (2027 level), which isn't on the P&L. Cash basis, so unposted bills and October's fifth payroll can move any month. Hours and pay rates aren't in the P&L. Healthcare and role questions go to your CPA and employment counsel. A plan to illustrate the path, not a forecast.

What it takes to get comfortably over $50K a week

Starting point: dining $48.0K + special events $1.7K = $49.7K a week, at the October pace. Growth comes from buyouts, special events, retail and extra covers in specific spaces.

$49.7K/wk	+$0.3K/wk	+$2.3K/wk
where core revenue is today	just over $50K (about $1.4K a month, $17K a year)	comfortably over: $52K (about $10.0K a month, $121K a year)

What one unit of each lever is worth

Lever	Unit	Sales added / year	Sales added / week	Margin kept / year
One more buyout	~$4K net added each	$4K	$0.08K	$2.4K
One more special event	~$10K each	$10K	$0.19K	$6.0K
Retail: each +$1K a month	$12K a year	$12K	$0.23K	$6.6K

Adding covers: what one more cover every night is worth

Space	Covers / night, Oct	Most it can seat	Room left a night	Spend / cover	Kept per extra cover	Sales / year	Sales / week	Margin / year
Chef's Counter	11.9	6 seats x 2 turns = 12	0.1 (full: needs more capacity)	$228	$121 (53%)	$66.1K	$1.27K	$35.1K
Dining Room	47.9	32 seats x 2.5 turns = 80	32	$94	$36 (38%)	$27.4K	$0.53K	$10.4K
Bar	17.0	11 seats x 3 turns = 33	16	$63	$16 (25%)	$18.3K	$0.35K	$4.6K

Per-space spend and margin per extra cover come from the app's revenue model (trailing 3 months: after food, drink, card fees, hourly service labor and variable costs), over about 290 service nights a year. Chef's Counter is 11.9 of 12 in October, so more Chef's covers need more capacity: more nights open (62 of 65 now), a third seating, or another seat.

Six ways to get there (2027 levels)

Mix	Retail	More special events / yr	More buyouts / yr	More covers / night	Sales added	Total sales	Operating result	After loan principal
Just over $50K Retail at the holiday pace of $4.5K a month	$4.5K/mo	0	0	—	+$1.0K/wk +$4.5K/mo	**$50.7K/wk**	**+$0.5K/mo**	-$14.7K/mo
Retail-led Retail reaches the $8K goal; a couple more events and buyouts	$8.0K/mo	+2 (0.2/mo)	+2 (0.2/mo)	—	+$2.4K/wk +$10.3K/mo	**$52.1K/wk**	**+$3.8K/mo**	-$11.3K/mo
Events-led Five more special events a year, mid-size retail	$5.0K/mo	+5 (0.4/mo)	+4 (0.3/mo)	—	+$2.4K/wk +$10.5K/mo	**$52.1K/wk**	**+$4.1K/mo**	-$11.1K/mo
Buyout-led About one extra buyout a month	$4.5K/mo	+2 (0.2/mo)	+12 (1.0/mo)	—	+$2.3K/wk +$10.2K/mo	**$52.0K/wk**	**+$3.9K/mo**	-$11.3K/mo
Dining & bar covers Two more Dining Room and one more Bar cover a night	$4.5K/mo	0	+2 (0.2/mo)	Dining +2 Bar +1	+$2.6K/wk +$11.3K/mo	**$52.3K/wk**	**+$3.0K/mo**	-$12.1K/mo
Chef's Counter expansion One more Chef's cover a night (needs added capacity)	$4.5K/mo	+2 (0.2/mo)	+2 (0.2/mo)	Chef's +1	+$2.8K/wk +$12.3K/mo	**$52.5K/wk**	**+$4.8K/mo**	-$10.3K/mo

Operating result includes the easier cuts (overtime back to September's level, small costs) and the low end of the healthcare savings, starting from -$2.0K a month before any growth. The OpenTable credit ending in late 2027 would take another $5.0K a month off each result.

Chef's Counter is the efficient lever; the bar is not. Each extra Chef's cover keeps about $121 (53% of its $228); a Dining Room cover keeps about $36 (38%) and a Bar cover about $16 (25%). Two more Chef's covers a night are worth about $70K a year of margin, which is about what the retail-led mix earns from all its retail, events and buyouts combined. But it needs added capacity, because it's already near full.

Reality check on the pace. 2026 special events: $87.5K (about $7.3K a month). Retail: Nov-Dec 2025 averaged about $4.5K a month. Buyouts: about four since the move from your records (July 4, Aug 25 Chaine dinner, Sep 29 Chef's Table, Oct 16 partial), about one a month. The Dining Room has the most room (47.9 of 80 a night) and the Bar 17 of 33, but those covers keep much less per head.

Notes. An extra buyout is assumed at about $4K net added, an extra special event at $10K; margins 60% (events, buyouts) and 55% (retail). Cover levers use the app's per-space margins above. These are my estimates; actual event costs, extra staffing and retail margins aren't in the P&L. Illustrations, not recommendations.

Special events and catering: where they stand

Event and catering revenue so far in 2026

Type	Jan-Oct 20	What it was	2026 budget
On-site events (4140)	$86.7K	Jan $41.4K, Feb $18.1K at the old location; Mushroom Dinner Oct 20-21, $27.2K. Other Cambridge St buyouts and dinners post to dining revenue.	$87.5K: $59.5K done + $28K planned for October
Off-site events (4170)	$0.0K	Outstanding in the Field dinner, Aug 23: $7.1K invoiced (000051), not yet paid, so not counted. Budgeted for September	$7.0K, expected in September
Catering (4200)	$68.3K	September only: Shackleford $24.6K (9/5) and Ostrow wedding $43.7K (9/26)	$68.3K
Other service income (4400)	$2.5K	James Beard Foundation Taste of America honorarium / travel reimbursement, received Aug 24	n/a
Total received	**$157.5K**	**11.6% of Jan-Oct 20 income ($1,353K), plus $7.1K invoiced and unpaid**	

On-site events: $59.5K posted in January and February, and the Mushroom Dinner (Oct 20-21) posted $27.2K, for $86.7K so far against the $87.5K budget, or about $7.2K a month. September's $10K on-site budget didn't happen.

Most of this revenue is already in the loss. The -$245K year-to-date operating result (through Oct 20) already includes $130K of it: $59.5K of on-site events, $68.3K of catering and $2.5K of other income. At roughly 55-60% margin (my estimate), that contributed about $70-78K; without it the loss would be nearer -$320K. The Mushroom Dinner's $27.2K posted after that cutoff, and the $7.1K Outstanding in the Field invoice will add once it is paid.

Catering has bailed you out. The two September events brought in $68.3K. After food and drink cost (~$16K), staff profit share and event wages (~$11K) and other direct costs (~$2K), I estimate they left about $35-40K of margin, about five months of today's operating loss. It was a one-time bailout, not a base to plan on.

Budgeting. Plan 2027 catering at $0, since the 2026 budget of $68.3K was a one-time event. Any catering that does come in is upside, not part of the plan.

Tracking. Track on-site special events in the event accounts (4140) so this report can follow them. Since the move, Cambridge St dinners and buyouts have posted to dining revenue, so they are inside the dining figure, not on top of it.

Notes. Event revenue is from the QuickBooks P&L, cash basis. Margins on events and catering are my estimates, not measured. Illustrations, not a forecast.
